CORE COMPETENCIES

Cloud & Infrastructure

- GCP
- AWS EC2 and S3
- Route 53
- IAM
- Windows Server
- Linux Administration
- Microsoft 365
- Google Workspace Administration (G Suite)

Endpoint Management

- Workspace ONE UEM
- Microsoft Intune
- MECM/SCCM
- Windows Autopilot
- Apple Business Manager
- MDM/MAM
- Device Lifecycle Management
- Application Deployment
- Software Deployment
- Patch Management

Senior Platform and Cloud Operations Engineer with 15+ years of experience supporting enterprise cloud, endpoint, identity, infrastructure, networking, and security environments across telecommunications, technology, education, healthcare, and media organizations. Expertise in AWS, Workspace ONE UEM, Microsoft Intune, MECM/SCCM, Active Directory, Microsoft Entra ID, Windows Server, Linux administration, PowerShell automation, IAM, and Zero Trust initiatives. Proven success supporting environments ranging from regional organizations to global enterprises serving more than 350,000 users while improving security, compliance, automation, operational efficiency, and platform reliability.

WORK EXPERIENCE

April 2026 - Current

Senior Platform Engineer ***AMAZING GRACE HOME LIVING***

- Automated 15 **provisioning tasks monthly** with Python, Git Bash and PowerShell to streamline platform administration.
- Manage **50 Active Directory objects weekly** across Windows Server and Group Policy administration.
- Design workflow automation for provisioning, reporting, and administration using PowerShell, SQL, and API integrations.
- Administer endpoint infrastructure and security controls, applying governance standards across managed systems.
- Build KPI reporting dashboards to improve visibility across endpoint and infrastructure platforms.

January 2025 - April 2026

EDN Technical Support Engineer II ***HCLTECH (Client: Verizon)***

- Supported enterprise endpoint, cloud, and mobility operations serving **70,000+ users** across Verizon environments.
- Managed over **300 endpoint enrollments weekly** to maintain device readiness across mobile and corporate fleets.
- Administered Workspace ONE UEM, Microsoft Intune, Active Directory, Windows Server, and Lookout Mobile Security for daily support.
- API integration with AWS EC2, S3, Route 53, and IAM services across cloud operations and access management workflows.
- Automated compliance policies, software deployments, device enrollment, and endpoint lifecycle activities.
- Troubleshot DNS, VPN, routing, authentication, and network incidents while producing SQL reports and KPI analytics.

October 2023 - January 2025

Software Developer (Freelance) ***IAGG INVESTMENTS***

- Built **40 REST API integrations monthly** to connect internal platforms with third-party systems.

Identity & Security

- Active Directory
- Microsoft Entra ID
- Azure AD
- Group Policy
- Conditional Access
- IAM
- RBAC
- Zero Trust
- Lookout Mobile Security
- Qualys
- Rapid7
- Tenable
- Tanium

Networking

- DNS
- DHCP
- VPN
- IPsec
- Routing
- Firewall Administration
- TCP/IP
- Network Troubleshooting

Automation & Reporting

- PowerShell
- Python
- Git Bash
- Ruby
- SQL
- REST APIs
- Firebase KPI Dashboards
- Process Automation
- Reporting Analytics

Identity Governance

- Multi-factor authentication
- Privileged access management

Cloud Operations

- Infrastructure as code
- Cloud migration planning

- Deployed **15 workflow automation solutions weekly** to streamline recurring development and operations tasks.
- Supported IAM requirements across integrated solutions, aligning access controls with application and system needs.
- Automated recurring business processes using PowerShell and JavaScript to reduce manual coordination.
- Established deployment standards for business applications, improving consistency across releases.
- Developed business applications tailored to operational workflows and internal user needs.
- Supported cloud systems that enabled reliable delivery of workflow and integration solutions.

August 2022 - October 2023
Technical Support Engineer II ***TANDYM GROUP (Pansophic Learning)***

- Resolved **35 support tickets weekly** across Intune, identity, endpoint, and server administration.
- Administered Intune, Active Directory, Entra ID, Windows Server, and Group Policy for daily support operations.
- Managed Windows Autopilot provisioning, endpoint compliance, and deployment workflows for managed devices.
- Supported Apple Business Manager and mobile device administration across corporate endpoints.
- Troubleshot DNS, DHCP, VPN, endpoint, and infrastructure issues to restore user access and connectivity.

February 2021 - April 2022
Technical Support / IAM Support Engineer ***INFOSYS (Client: Google)***

- Supported identity and access governance for **350,000+ enterprise users** across a global environment.
- Improved compliance by **24%** and cut ticket volume by **58%** through tighter access controls and support workflows.
- Managed user migrations, authentication support, and lifecycle administration for enterprise accounts.
- Resolved DNS, authentication, and connectivity issues across GCP integrations, VPN, and firewall environments.
- Bridged technical support with platform teams to restore service faster during complex access and network incidents.
- Designed an internal training portal as SME for Google Admin Toolbox and GCP support processes.
- Documented access and migration procedures to standardize support and improve knowledge sharing across the team.

September 2016 - February 2021
Network & Security Administrator ***ALLIED UNIVERSAL***

- Published **35 compliance reports weekly** through a portal that tracked security KPI metrics.
- Improved **deployment success rate by 17% within 2 months** after launching a compliance and software portal.
- Administered Windows Server, Active Directory, Group Policy, and endpoint security controls across the environment.
- Managed MECM/SCCM software deployment, patching, and administration for enterprise endpoints.
- Led vulnerability remediation efforts using Azure, Milestone, Qualys, Rapid7, Tenable, and Tanium.

March 2011 - October 2016

Endpoint Engineering

- Mobile device management
- SCCM administration
- Endpoint compliance

CERTIFICATIONS

Microsoft Azure Solutions Architect Expert

Google Workspace Professional Administrator

CompTIA A+

G Suit Administration

EVS Encoder / Network Administrator ***NIELSEN MEDIA RESEARCH***

- Developed PowerShell, Bash, SQL, and Ruby automation that reduced ticket volume by **19% within 2 months.**
- Administered Active Directory, Windows Server, and Linux systems to support stable day-to-day operations.
- Supported EVS operations and hybrid services, coordinating platform availability with internal technical teams.
- Managed DNS, DHCP, VPN, and IPsec services while troubleshooting connectivity and routing issues.
- Configured firewall controls and resolved access issues to maintain secure network communication.
- Supported BMC system administration and issue resolution to keep operational workflows moving.

EDUCATION

January 2014
Bachelor of Science Business Studies, Computer Information Technology
Southern New Hampshire University, Hooksett, NH

January 2009
Associate of Science Computer Information Technology
Everest University, Clearwater, FL
